Low-Fidelity Wireframe

The low-fidelity wireframe is made to be a simple and easy to use. It was made to be user friendly so that all the functions are similar to other banking app.

Make an Account Easily

Home Screen

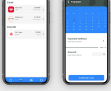

The home screen is made so that it displays the present card and deposit accounts, as well as any bitcoin or other accounts. User can add multiple cards/deposit/bitcoin. Also, user can click on the accounts to make a payment, deposit money or transfer. There's also a navbar that lets you navigate from home, payment, connection and account setting.
